From The D C to Govt Dept

Letter No M6-3952/1941, Dt 14 3 42

Requests sanction to an estimate for Rs 6260 for the improvement of the distribution System of water Supply at Hoskote, the Cost being met by Govt and the local Municipal Council in equal proportions

1) The revised estimate for Rs 24 100 for the water Supply Scheme to Hoskote town was sanctioned in G.O. Dated 19th Oct 38, the Cost being met by Govt and the local mnl Council in equal proportions A loan of Rs 3,360 was given to the mnlty in order to enable them to meet the excess Cost Still a sum of Rs 2573-64 is due outstanding against the mnlty

2) It is now reported that the distribution System is unsatisfactory for more than one reason The present System is proposed to be overhauled and improved so as to give house Connections also the Estimate for the improvement of the distribution System is for Rs 6,260

3) The estimated Cost is proposed to be met by Govt and the mnl Council in equal proportions The Govt share of the Cost being met out of the W S grants for the current year and a loan of Rs 3130 being given to the mnlty to meet the share of the Cost The proposed loan being repaid by annual instalments of Rs 300 each and the income of nearly Rs 600 being anticipated above Cancelled now and the repayment of the loan

13) The Hosakote water supply scheme was completed about three years ago & as such the present proposal to overhaul the distribution system so soon appears to be one which cannot be easily accepted when the survey of the town was made for laying the distribution system, were not the lower levels of the town taken into consideration and necessary action taken to ensure the adequate distribution of water to such localities? If not who is responsible for this defective estimating which has necessitated a further outlay so soon? Information on this point has to be obtained

14) It has also to be ascertained if the pipes are procurable at Bharamsagar & that the old pipes would be disposed of, when replaced

15) As this is only an improvement of the existing system of water supply to which the people have contributed a moiety & as it is stated that the Municipality derive a revenue of Rs 6000 p.a., it seems reasonable that the entire outlay of Rs 6,96,000 should be met by the Municipality & Government could have been approached only if, when the scheme was originally formulated, the present aspect also had been taken into consideration. This will be pointed out to the D.C. when disposing of the defects pointed out by the Accountant General in his Audit Report for the year 1941-42.

Furnishes certain information

20) It is stated that the defects now noticed in regard to the unsuitable and inadequate distribution system of water supply at Hoskote are not due to any defective estimation at the time of formulation of the original scheme but due to the original provisions in a view to cut down the cost to suit the finances of the city. If the original estimate Rs 31,852 had been worked out in the beginning alone there would not have been any necessity for the proposed improvements in the distribution system at present

Improvement of the distribution System of water Supply to Stokes town

21) Further the estimate for Rs 6260 prepared last year for replacement of mains of the mains does not stand under present conditions and the cost is expected to come up to Rs 10,000/- which the Mcty is not in a position to incur. In addition to this there is the usual difficulty of getting the required supply of the required pipes, machinery etc. In view of these facts both the D.C and the Dy.C.P.H are of opinion that the proposal may be ordered to be dropped for the present.

22) There appears however, to be a proposal under consideration for the construction of a low lift pump pit for the installation of the pumping unit estimated to cost Rs 1360/- which is expected to assure a steady and even supply of water to the town which is now before the municipal Council

23) Submitted for orders if the proposal may be dropped as recommended by the D.C and the Dy.C.P.H

24) The Concurrent powers of the Dir of P.H & the D.C may be accepted & the proposal dropped for the present. The plans & estimate will be returned to the Dy.C.P.H

Sir

Subject:- Improvement of Water Supply distribution system at Hoskote - forwards proposals for the

I have the honour to state that the Municipal Council of Hoskote represented that there was a great demand for more tap connections to private houses but that these were refused on account of the limited capacity of the present main and sub-mains to feed the additional tap connections if given The Sanitary Engineer who was requested to suggest measures to meet this difficulty has sent an estimate for Rs 6260/- for overhauling the distribution system of water supply to Hoskote Town, with a view to improve the present supply

2 It is seen from the report accompanying the estimate received from the Sanitary Engineer that as the present single distribution main of 3" C.I pi is laid at a level lower than some parts of the Town all the water is drawn to the lower portions while the localities which are in a higher level viz blocks 23 and 24 do not get an adequate supply of water Hence the laying of two distribution sub-mains and replacement of the present 3" main by 4" C I pipe are now proposed It is also stated that if the improvements are completed, the Municipality can give as many house connections and public taps as are required

3 The Amildar-President of the Municipal Council reports that more house connections would result in the ~~Mmm~~ increase of the revenue to the Municipality, besides ensuring adequate supply of water to all the parts of the Town About 50 private connections are expected to be taken by the parties in the locality and an annual increase of revenue by Rs 600/- is anticipated thereby After discussi with the Assistant Engineer, Bureau of Sanitary Engineering the Amildar-Preside reports that necessary pipes are procurable at Bhadravati and that there is little change in the post-war market for them The work of replacement of mains and

and sub-mains is an urgent necessity

4 Regarding the ways and means to finance the scheme the Municipal Council have resolved at their meeting held on 20-12-41 that on account of their slender resources, the entire cost can not be borne by them They request that one half of the estimated cost be sanctioned as outright grant from Town Water Supply Funds and the other half as loan repayable in annual instalments of Rs 300/- each The increased revenue resulting from more house connections is proposed to be ear-marked for repayment of the loan

5 A loan of Rs 3360/- was sanctioned to this Municipality during the year 1938-39 towards the cost of water supply scheme which is now completed This loan is repayable in 8 annual instalments with 4½% interest as per G O No L 3127-30 M1 56-37-99 dated 19-10-1938 The Municipality has been regularly repaying the instalments in respect of this loan, 2 instalments of Rs 500/- each (inclusive of interest) for the year 1939-40 and 1940-41 having been already adjusted The remaining amount of the loan to be repaid with interest is 2573-6-4

Flag I

6 In view of the urgency and need for the improvements in the scheme of water supply to the Town I think that the request of the Municipality deserves sympathetic consideration I therefore request that sanction of Government may kindly be obtained to the grant of half the estimated cost out of the reserve held under Town Water Supply Grants for the current year the remaining half being sanctioned as a loan repayable in 10 annual instalments.

7 The connected records accompany for favour of reference and return

Subject Improvement of the distribution System of water Supply to Hoskote town

With ref to your letter No M6-3952/Hosk 8/14 3 42 requesting sanction to certain proposals re the above subject, I am directed to observe as follows

The scheme of water Supply to Hoskote town was completed about three years ago It is not made clear why it is proposed to overhaul the distribution System so soon The M.S. Scheme ~~completed~~ completed so recently as the year 1938. When the Survey of the town was made for laying the distribution System, were not the lower levels of the town taken into Consideration and necessary action taken to ensure the

adequate supply of water to such localities?
If not, who is responsible for the defective
estimating which has necessitated a
further outlay so soon?

How the old wells are proposed
to be disposed of and whether the
~~new~~ wells required now are
procurable at Bhadravati in
view of the international situation
may be kindly stated

As this is only an improvement
of the existing system of water supply
towards which the Govt have contributed
a moiety and as it is stated that
the Mysore would derive a revenue of Rs 600/- p a
if ~~the scheme~~ reasonable rates that the
entire outlay of Rs 6260 should be
met by the Hosketi ~~Municipal~~ Mysore Council. This Govt have
been awarded some savings effected,
if ~~when the scheme~~ the present revised estimate
had been taken into consideration, when the scheme
was originally formulated.

I am to request that information as to the
Govts reference to above may be furnished by Commissioner Bangalore
for the defective working of the Mysore Council
The records accompany.

Subject Improvement of the distribution system of water supply to Hoskote Town

With reference to your letter No 11426-M1 70-41-11 dated 3-6-42 on the above subject, I have the honour to forward herewith a copy of letter No 15 dated 3-7-1942 from the Sanitary Engineer, Bangalore addressed to the Director of Public Health in Mysore, Bangalore (copy received by me) answering all the points raised in your letter under reference It is seen therefrom that insufficient provisions in the original estimate of water supply scheme is not due to any defective estimate but to the reduction in the original provisions with a view to cut down the cost to suit the finances of the Municipality It is said that if the original estimate for Rs 31,852/- had been worked out in the beginning alone, there would have been no necessity for the proposed improvement in the distribution system

2 It is further seen from the Sanitary Engineer's letter referred to above that the estimate for replacement of mains and sub-mains prepared last year is not workable now owing to abnormal rise in the prices of materials and non-availability of cast iron pipes from Bhadravathi due to the present international situation The cost of pipes is stated to have now risen to nearly 6 times the original price As against the original estimate for Rs 6,260 the cost as per current rate is expected to come up to Rs 10,000/- The Sanitary Engineer, therefore recommends that the work may be deferred for the present

3 The Municipal Council is not also in a position to take up the work on account of its slender resources The Sanitary Engineer has separately sent an estimate for Rs 1340/- for the construction of a low lift pump sit for installing the pumping unit

Copy of letter No. 15 dated 3rd July 1942, from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Director of Public Health in Mysore, Bangalore

---

Subject Improvement of the distribution system of water supply to Hoskote Town, Bangalore District.

With reference to your No C 104-10 dated 8th June 1942 forwarding copy of letter No L 11427/M1 70-41-11 dated 3rd June 1942 from the Secretary to Government, Law Department, Bangalore to the Deputy Commissioner, Bangalore District, Bangalore for report, I have the honour to furnish below the required ~~inform~~ information on all the points raised in the above letter

The estimate for Rs 17,440/- ~~was~~ sanctioned by Government in their order No L 3437/M1 81-36-15 dated 19th November 1936 was for the minimum requirements of providing only 15 public fountains The sizes of distribution mains were also provided to suit the above When additional provision was desired, an estimate was prepared for Rs 31,852/- providing for 25 fountains and 50 house connections The Municipality considered the cost prohibitive and desired the work to be executed with only minimum requirements of ~~max~~ 15 public fountains As the work though completed recently provided for the minimum requirements only, the urge for ~~more~~ additional facilities has been felt. The present estimate has therefore been prepared to provide additional public taps and house connction to the extent of 50. This will considerably improve the water supply to the town If the estimate of Rs 31,852/- referred to above had been executed in the beginning alone, it would have covered the requirements of the present estimate As such, it is seen that insufficient provisions in the original estimate is not on account of the defectiveness of the estimate but the lessening of the original provisions, in consideration of the cost of the scheme being cut down as was desired by the Municipality.

The pipe that are proposed to be removed from one locality where bigger sized pipes are to be laid will in their turn be used at other localities where additional supply is to be given, so that the new pipes and all released pipes will be laid in localities where there are no taps and none of these pipes will remain unused after effecting these improvements

The estimate was prepared over a year ago, when C I pipes from Bhadravathi were easily available At present, the supply is uncertain and can only be expected after a long period ~~after~~ after the orders are placed The cost of lead for caulking has gone up very high As regards G I. pipes of which there is a provision of 950' at Rs 0-10-0 rft the present rate is about six times the estimate rate In many other items also, the rates have increased considerably The estimate is therefore not workable at the cost provided therein Against Rs 6,260/- of the estimate, the cost as per present rates may come up to Rs 10,000/-. As such, it is desirable to lodge the estimate for the time being

Sir,

Re Improvement of the distribution system of water supply to Doddaballapur Town, Bangalore District

With reference to your memo No L 11428 dated 3rd June 1942 forwarding for information a copy of letter No L 11427/41 70-41-11 dated 3rd June 1942 addressed to the Deputy Commissioner, Bangalore in connection with the estimate for Rs 6260 for overhauling the distribution system of water supply to Doddaballapur Town, I have the honour to enclose herewith a copy of letter No 15 dated 3rd July 1942 of the Sanitary Engineer, furnishing the information called for by Government from the Deputy Commissioner, Bangalore The Sanitary Engineer states that on account of the rise in rates when compared to the provision in the estimate for Rs 6260 which was prepared over a year ago the cost as per present rates may come to Rs 10,000/- and is therefore of the opinion that the estimate may lie over for the time being

I have the honour to be,
Sir,
Your most obedient servant,

D Ganapathy

DIRECTOR OF PUBLIC HEALTH

so that the new pipes and all released pipes will be laid in localities where there are no taps and none of these pipes will remain unused after effecting these improvements.

The estimate was prepared over a year ago, when I pipes from Bhadravathi were easily available. At present, the supply is uncertain and can only be expected after a long period after the orders are placed. The cost of lead for caulking has gone up very high. In areas where I pipes, of which there is a provision of 900 at Rs. 0-10-0 rft the present rate is about six times the estimate rate. In many other items also, the rates have increased considerably. The estimate is therefore not workable at the cost provided therein. Against Rs. 6,460/- of the estimate, the cost as per present rates may come up to Rs. 10,000/-. As such, it is desirable to lodge the estimate for the time being.
